The Pakton IP Energizer[®]

The Pakton IP Energizer and IP Energizer Controller app combine the latest technology to provide you with the ultimate in farm control.

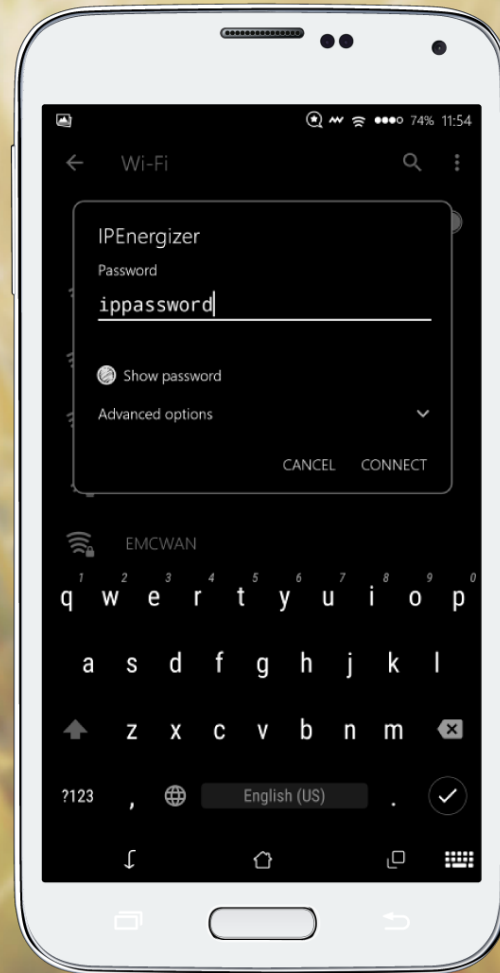

Compared to more complex fence monitoring systems, the IP Energizer is an all-in-one solution to farm management - no need for extra devices or complex and expensive systems. With in-built IP technology, simply connect your energizer to a wireless network and download the IP Energizer Controller app to your smartphone for convenient and reliable fence monitoring from anywhere in the world.

The energizer works by sending updates and alarms to your phone via your home or farm's local WiFi network. With the Pakton IP Energizer, electric fence management becomes a breeze, improving efficiency and

ease of monitoring. When problems do occur, the IP Energizer keeps you in control, allowing you to turn the energiser off and on remotely at the touch of a button.

Read on to see how the Pakton IP Energizer and IP Energizer Controller app can transform the way that you manage your electric fence, saving you time and money.

Download

Download the IP Energizer Controller app from the Google Play Store

Configure

Set your login details and connect your energiser to your home WiFi network
