

Electric Fence Power Probe® II

AG PRODUCTS

PTE0110

An Australian original, the award winning Electric Fence Power Probe® was developed to simplify the detection of faults on large permanent electric fences.

By accurately measuring the current flowing in the fence 'live' wire the Power Probe will lead you directly to the fault.

Product features

- waterproof and impact resistant case
- simple to use – one touch operation
- clearly indicates the direction of the fault
- leads you quickly to the fault in the fence
- digital reading shows the voltage and current
- no wires or clips means no tangles or shocks
- low battery indicator
- uses a standard 9V battery
