

# Sanctuary Monitor

## SECURITY ELECTRONICS

### PTE0480

This Electric Fence Monitor monitors takes up to eight standard or four sets of bi-polar electric fence live lines. The monitor looks at all lines continuously and can report on a serial data link to a PC or SCADA RTU. Applications include multi-sector security electric fence systems, zoos and sanctuaries with electric fenced animal enclosures, long line multi-wire feral animal fencing and large pastoral stations. All inputs must be run from the same energiser to comply with Australian Standards.

### Product features

- wall mountable IP65 enclosure
- 10kV rated opto isolation from fence inputs to monitor outputs
- state of the art microprocessor circuit
- may be operated from any 12V nominal supply such as a 12V DC battery
- low power drain
- 8 conventional or 4 bi-polar (4 pairs of) electric fence inputs
- monitor status indicators including fence input fail LEDs (with adjustable fail level and time out)
