

Electric Fence Remote Monitor

SECURITY ELECTRONICS

PTE0700

The Remote Electric Fence Monitor provides peace of mind for any property owner with remotely situated electric fences. Rugged, weather-proof design interfaces directly with radio telemetry gear to monitor remote electric fences on any property. Low power consumption means long battery life, and its high voltage isolation protects expensive telemetry gear from electric fence voltages.

Product features

- 0-5V and 4-20 mA current loop output proportional to fence voltage
- 10kV isolation of equipment from fence voltages
- very low power consumption
- weatherproof IP65 enclosure
- 90db outdoor siren option for stand alone applications (PTE0701)
